Quick User Guide

GPS Navigation Software

## Useful Tips and Guide

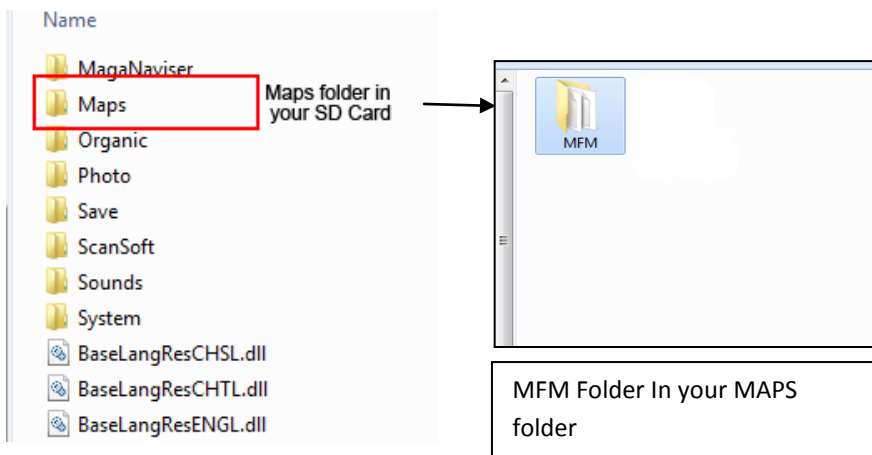

- 1) Please ensure you register your Software at our support site to enjoy updates and customer support. Log on to <http://support.m3gps.com> for Navigation Software registration and info or <http://www.pioneer.my/> for hardware info.
- 2) Do not use sharp instruments on the Touch screen. This may scratch the screen permanently.

## Updating Maps

Malaysia, Singapore and Brunei maps are provided freely by Malfreemaps (www.malfreemaps.com) You are able to log on to <Http://Support.m3gps.com> or <http://www.pioneer.my/>, click on M3GPS OEM Navigation Software (Left link) and find the latest MFM\_PAPAGO maps. (Detailed instructions are provided on the Support website)

Once you have downloaded the latest maps, connect your SD card to your computer via a Card Reader.

Go to the MAPS folder and copy the new folder into the MAPS folder.

## Software Features

Realistic 3D Buildings

Junction Views

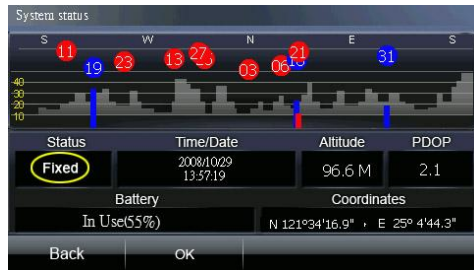

Lane Assists

Travel Guide

## Quick Start

Firstly, ensure that you've received a fixed satellite signal on your device. This may take a few minutes depending on weather, car tinting, tall structures/objects, and signal interference. Go to **Advance Settings** and Click **System Status**. The Status should state **FIXED**.

System Status

Once you've gotten a **FIXED** status, you may proceed to set your **Destination**.

The 2 most common methods are **Road Search** and **POI Search**.

**Road Search** : Select this if you know the Road Name and Address. Tips, you do not always need to Type JALAN or LORONG.

**(Points of Interest) POI Search**: If you know the Building or Structure name. Eg. Banks, Shopping Complexes, Petrol stations..etc

Road Search

POI Search

Once you've selected your destination, just click **GO** and the GPS navigator will guide you.

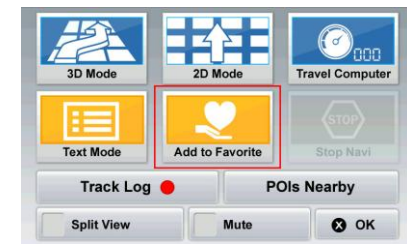

Click GO!

## How to Save Favorites Location

Map View Functions

Click here to Enter MODE

You may point anywhere in the Map to save. Once you have identified a location as Favourites, click **MODE**. Then select **Add to Favorites**.

Once done, you are able to see your saved locations under **Favorites** inside Destination.

Example of the SD Card Navigation Software:

**\*WARNING:** Do Not Loose, misplace or damage the SD Card. Keep away from liquids and heat. Charges may incur for any replacement or repairs.
